

Cybersecurity delivery, mission assurance, and AI-enabled operations from initial assessment through implementation, verification, and operational improvement. enLight10 helps government, defense-industry, regulated, and commercial teams identify risk, organize evidence, strengthen operations, and integrate Watchtower workflows without replacing existing tools.

Core Capability Areas

Cybersecurity & Compliance Services - Security posture, maturity, and gap assessments - NIST CSF, NIST 800-53/171, CMMC, and SOC 2 readiness - Policy, IR, evidence, risk register, and remediation review - Security architecture, Zero Trust, and implementation roadmaps	Watchtower Product & Integration - Watchtower pilots, deployment, and tool/data integration - Mission Twin, entity mapping, evidence, and provenance - Governed AI Workers and closed-loop workflows - Custom modules, dashboards, reporting, and transition support
SOC, Detection & Mission Assurance - SOC/MSSP maturity, operating models, playbooks, and metrics - Sentinel, Splunk, Elastic/OpenSearch tuning and workflow design - Incident, vulnerability, and infrastructure-resilience workflows - Mission impact, executive visibility, and verified outcomes	Prime, Subcontract & Specialized Support - Bounded cyber, compliance, engineering, and R&D work packages - Federal/defense support, SBIR/STTR teaming, and prototypes - OT/ICS readiness with specialized testing partners - Surge, white-label, and partner-delivered assessment support

Assessment-to-Action Delivery Model

1. Intake Mission/business context, systems, drivers, policies, evidence, goals	2. Assess Security posture, control gaps, exposure, process maturity, constraints	3. Map Findings to controls, risk, dependencies, owners, evidence gaps	4. Prioritize Quick wins, high-risk fixes, roadmap, owners, outcomes	5. Improve Engineering, remediation tracking, playbooks, Watchtower, verification
---	---	--	--	---

Differentiators & Primary Use Cases

Differentiators Practitioner-led: 15+ years across DoD, federal, SOC, incident response, architecture, compliance, and OT/ICS environments. Assessment to verified action: Turns findings into owners, remediation workflows, evidence, and measurable outcomes. Product plus services: Watchtower is delivered with integration, engineering, advisory, and support. Prime-friendly: Bounded work packages, partner delivery, existing-tool integration, and no forced rip-and-replace.	Primary Use Cases - DIB contractors preparing for CMMC/NIST 800-171 and prime expectations - Government/public-sector cyber assessment, mission assurance, and program support - SOC maturity, detection engineering, incident response, and infrastructure resilience - Watchtower pilots, integrations, and AI-enabled workflow modernization - Prime contractors needing cyber, compliance, prototype-integration, or R&D support - OT/ICS readiness with partner-supported testing - Regulated and small businesses needing risk baselines, evidence, and remediation plans
---	--

Representative Service Packages

Package	Outcome	Typical Deliverables
Cyber Baseline Assessment	Establish current risk and priorities	Evidence review, risk register, executive summary, remediation roadmap
Compliance Readiness Sprint	Prepare for audits, RFPs, and customer review	Control mapping, policy/IRP review, evidence gaps, prioritized plan
SOC / Mission Assurance Uplift	Improve detection and response operations	Maturity review, playbooks, escalation model, metrics, tuning advisory
Watchtower Pilot & Integration	Prove a governed closed-loop workflow	Data integration, configured workflow, entity/Mission Twin mapping, evidence trail, pilot results
